

# Safeguarding and promoting the welfare of children is everyone's responsibility.

# IMPACT EDUCATION MULTI-ACADEMY TRUST

# Mission

Impact Education Multi Academy Trust is on a mission to improve the life chances of children and young people and improve social mobility for the disadvantaged.

# Vision

A Trust where hearts and minds connect; values-driven partners who work collaboratively to ensure education impacts positively on students, families, communities and staff.

Impact is a values driven organisation with the belief that collaborative leadership and strong partnership development can lead to significant positive impact on the quality of education. We believe that this can happen without schools losing their own identity.

We are an organisation where Hearts and Minds Connect and have developed a culture and ethos that ensures children and young people achieve the very best outcomes whilst developing a life-long love of learning. We have high expectations academically but we also place a great emphasis on positive attitudes to learning and building effective relationships with others. Our children and young people are encouraged to develop themselves as fully rounded, emotionally intelligent individuals. Our people are highly valued and encouraged to take advantage of the wealth of developmental opportunities across the Trust.

# Measuring Academic Progress September 2024

The Whitley AP Academy

Status	Optional

# **Academic Progress and Assessment**

The use of assessment needs to be a meaningful and informative process, which allows the Academy to accurately measure the progress of all learners and also inform future teaching and learning to ensure it is effective and meets the needs of our learners.

In order to make sure that our model of assessment is fit for purpose we predominantly use formative Assessing Pupil Progress (APP) as the method of assessment for learners at the Academy. This model is the most appropriate for the needs of our learners, it is based on long-term low stakes measuring of progress led by teachers, and does not place undue pressure on pupils throughout the school year.

We conduct three cycles of data collection for each pupil throughout the academic year; progress data is typically collected in Weeks 13, 26 and 38; for pupils studying Core Subjects in Key Stage 4, a baseline assessment grade will be established in the fourth week of the academic year / their placement at the Academy.

Academic Progress will be recorded in a range of formats based both on key stage and subject;

Effort and Behaviour Grades are recorded using a fixed format across the school, details of this are below:

# **Effort**

- A Outstanding approach to all areas of work, which could not be improved upon in any major way.
- B Good approach to all areas of work and regularly demonstrates a positive work ethic.
- C Appropriate levels of focus and determination demonstrated on most occasions but room, at times, to be better.
- D Inconsistent approach to work; focus and determination need to be improved.
- E Rarely produces work to an acceptable standard.

#### **Behaviour**

- 5 Always displays excellent behaviour in school & consistently makes good behaviour choices.
- 4 Regularly displays good behaviour in school & typically makes good behaviour choices.
- 3 Sometimes displays appropriate behaviour in school & can make good behaviour choices.
- 2 Rarely displays appropriate behaviour in school & struggles to make good behaviour choices.
- 1 Consistently displays challenging and inappropriate behaviour in school & rarely makes good behaviour choices.

# **Progress in Key Stages 2 and 3**

Pupil progress in each subject is measured using a competency-based model; within each assessed subject, teachers will have Assessing Pupil Progress (APP) Trackers in place. The APP Trackers will be updated on a regular basis by subject teachers to demonstrate the progress being made by pupils, recorded progress will reflect pupils' completed work in books / files.

For each assessed subject, teachers have identified the key competencies / learning intentions which pupils need to develop in order to make progress within the Programme of Study (PoS). As pupils progress through a Programme of Study, it is expected that they will demonstrate development in their knowledge, understanding and skills.

An example of the format of the APP Trackers can be found below:

- Within the tracker there is space to define the competency / learning intention,
- A section which is used to show progress a star which will be either bronze, silver or gold

   this will clarify how secure the progress made actually is,
- Finally, a section to date when the progress was made.

Use the possessive apostrophe correctly.	Use apostrophes for the contracted form of words correctly.	Punctuate most sentences and include a range of punctuation.	Use some prefixes such as 'un', and suffixes such as '-ing', '-ed', '-er' and '-est'.	
Date:	Date:	Date:	Date:	

Good progress is defined as achieving approximately seventy-five percent of the APP competencies / learning intentions during a full Programme of Study. Within each APP Tracker the number of competencies / learning intentions is broken down into termly blocks, the expected rate of progress is also defined, in order to clarify what the rate of 'good' progress is - an example of this information can be seen below:

Total number of compete	ncies: 120	120	
Year One	Week 13	Week 26	Week 38
Expected 'Good' Progress	15	30	45
Actual Progress			
Attendance			
Year Two	Week 13	Week 26	Week 38
Expected 'Good' Progress	60	75	90
Actual Progress			
Attendance			

In the example above, seventy-five percent of the competencies / learning intentions would be ninety in total; this rate of progress when distributed over the six terms would mean that 'good' progress for a pupil is to achieve fifteen competencies / learning intentions during each term of their time with us at the Academy.

# **Progress in Key Stage 4**

Academic progress is tracked using two different formats in Key Stage 4. For the Core subjects of English Language, English Literature, and Maths, we will use GCSE grades, though these will be broken down into smaller parts to enable us to show more incremental steps of progress within a GCSE grade. Non-Core subject progress will be tracked using the same competency-based APP format in Key Stages 2 and 3.

Pupil progress in Core Subjects will be tracked using the following format:

•	Entry Level 1	(EL1)
•	Entry Level 2	(EL2)
•	Entry Level 3	(EL3)
•	Grade 1 Emerging	(1E)
•	Grade 1 Developing	(1D)
•	Grade 1 Secure	(1S)
•	Grade 1 Mastery	(1M)
•	Grade 2 Emerging	(2E)
•	Grade 2 Developing	(2D)
•	Grade 2 Secure	(2S)
•	Grade 2 Mastery	(2M)

o This continues up to Grade 9.

Pupil progress in Non-Core subjects will be tracked using APP Trackers in the first instance, these subjects / courses can be either for one or two years – depending on the subject, for example – Construction and Hospitality & Tourism are one-year courses, whereas Applied Science and Information Technology and Vocational Studies are two-year courses. Each subject will have an identified number of competencies from the BTEC course specification, all of which need to be evidenced / completed by a learner in order to pass the course.

Once the number of competencies has been identified, this number is then divided into three equal parts – one for each term; during each assessment cycle we will record how many competencies have been achieved / evidenced.

An example from a vocational subject would be in the BTEC Level 1 Introductory in Construction; there are thirty-three identified competencies needed to pass the course, at each stage of assessment, it would be expected that approximately eleven competencies have been achieved for a pupil to be 'on-track' to achieve this qualification in the time set.
